

Why the interaction budget changes the answer: the fitness gap is near zero either way
 readme_best vs residents, N=100, 400 generations, 1% action + 1% observation error

A. Fitness gap per run, by outcome
 black bar = mean; dashed = zero advantage

B. Fitness gap vs outcome
 A clusters at (≈ 0 , 1.0) and (≈ 0 , 0.0); B at (≈ 0 , 0.37)
 open squares: coexisting runs; dotted line: 0.5
